Claim Rejections - 35 USC § 112

1. Claims 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the claim, parsed snippets are indefinite in scope. When does a image become a snippet.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 13,14 are rejected under 35 U.S.C. 102(b) as being clearly rejected by US patent # 5774882.

4. Figure 1 of the patent teaches of converting credit card forms to electronic format including a receiving (fax or mail), reading, processing and making the forms available for subsequent processing. Moreover, the patent teaches a workflow contingent on flagged content. (column 3, lines 28-30). The applicant's newly added limitations are anticipated by figures 1/80, 1/90, 1/100 and 1/110, code identifiers can read on dates, priorities can read on First in first out type constructs.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 13-14 and 19-30 are rejected under 35 U.S.C. 102 or in the alternative 103(a) as being unpatentable over US Patent # 5,774,882.

The rejection is set forth in the previous office action. The prior art clearly teaches that within the art of converting forms from paper to electronic format, it is well known to read the data in whole or in part and to conditionally process the forms based on the data contained therein (Figure 1). Have defined this art recognized variable, it would have been obvious for one skilled in the art to have verified the data in whole or in part depending on the desired result. One such conditional processing is that directed to fraud detection. While the prior art does not teach every fraud detection step, it seems reasonable to assume that this step includes those claimed by the applicant. In the alternative it would have been obvious for one skilled in the art at the time to have modified the prior art as motivated by need to add additional security.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3624

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
